No.: TECH-15011/38/2025-CCA-PCBA/90

Dated Guwahati: As Signed

To Whom It May Concern

Assam Pollution Control Board is pleased to recommend M/s Greenovo Eco Solutions Pvt. Ltd., a Government of Assam-recognized startup (Cohort 5.0), also registered under Startup India. The company was authorized by the Guwahati Municipal Corporation to conduct a trial run for reducing methane emissions at the Belortol Swacchata Kshetra, Boragaon, Guwahati, over a 500 sq. meter pilot area from April to June 2025.

The company deployed an innovative pipe biological solution recharge system, introducing carefully selected microbial consortia directly into the waste matrix. This biological approach aimed to suppress methane generation.

The findings demonstrate that M/s Greenovo Eco Solutions possesses a technically sound, cost-effective, and scalable solution for landfill methane management. We endorse this startup and recommend that relevant authorities, institutions, and funding bodies consider supporting the wider deployment of their technology across landfill sites in Assam and the region.

Dr. Arup Kumar Misra

Chairman, Assam Pollution Control Board
